

Observation Instructions:

1. Set up a Zoom session with recording and invite the participant to share their screen and (optionally & with consent) camera feed.
2. Send the participant a link to the Qualtrics experiment survey. Give them their participant ID and to begin when they are ready.
3. Let the participant follow the task instructions on the Qualtrics survey and encourage them to think out loud and describe why they are making the choices and actions that they make.
 - a. A participant-observer researcher can engage in conversation regarding the actions and choices that are being made and take notes on what happens during the session on the observation sheet
